SEYA Group Company Overview

COVER LETTER

LiveRAMP

September 30, 2021

Greetings!

Dear client,

On behalf of the entire SEYA Group team, I can't begin to explain how thrilled we are to have been selected to submit a Skill Set Proposal to LiveRamp.

We look forward to showing the LiveRamp team why SEYA Group offers strategic security solutions that will address the current and future challenges within the company. With SEYA Group as your partner, we will assist in creating scalable, innovative and customized cloud and security solutions.

As outlined in this proposal, you will find key responses that meet and exceed your requirements along with the custom security solutions you requested. Should you need any other information to move this process forward and further validate your decision, please let us know.

We are grateful for this opportunity and look forward to future discussion.

Thank you for your time,

Yan Tandeta
Chief Executive Officer

Yan Tandeta

ABOUT US

"Cloud products for every business size"

We are a client-centred software development company focused on meeting your specific digital needs. Our team is assembled world-class architects, developers, and engineers from across the globe to ensure we deliver reliable services to our customers.

Drawing on a special group of experts and their experience, our dedicated staff are multi-national talents, who have earned their position with us based on their training and experience. Our digital wizards' flexibility and outstanding expertise guarantee that they'll create exactly the kind of cloud solution that your business needs.

WHY WORK WITH US

Whether you're thinking about adopting cloud technologies, upgrading your workflows through cloud-native designs, rethinking your data pipelines, or optimizing your systems, our task force of professional, multi-cloud certified engineers and architects can help accelerate your business in terms of cloud computing and cloud performance.

We deliver value.

Once we understand how we can benefit your business, we'll align and if desired integrate our approach with your teams and workflows, so the transformative changes to your system will have a negligible impact on your daily operations.

Our work speaks for itself.

Comprised of experienced, knowledgeable, and hard-working experts, our client-centred software development company can't help but deliver the best work possible.

You're not just another client to us.

We understand that every business has its unique story, built by hard-working people. Our focus and dedication to meet your digital needs is our way of recognizing that legacy.

We'll work beyond the project scope.

As we accompany you in the process of digital transformation, our dedication to you means that we make sure that you're 100% satisfied. This still holds true even after we have completed the project!

EXPERT TEAM

Meet our bold leaders who will guide the way to new digital horizons in the connected world

Yan is the public face of the company. His responsibilities include making major corporate decisions and managing the overall operations and resources of the company. He also acts as the main point of communication between the board of directors (the Board) and corporate operations. He is an agile agent of change, an accomplished customer advocate, and a relentless contributor to team innovation, sustainable growth, and predictable success.

EXPERT TEAM

Meet our bold leaders who will guide the way to new digital horizons in the connected world

Besides being the Chief Technical Officer here at the SEYA Group, Sean currently sits on the board of advisors for numerous companies, in which he applies his valuable skills to the boards' day-to-day procedures. His passion for growth within technology is key to any business looking to expand their solutions. Over the years, he has gained experience working with micro-companies such as Dignii, Whatifi, RXtoME, and PrizmMedia and has helped them evolve into successful businesses. In addition to micro companies, Sean's experience also extends to highly successful companies such as Boeing, Netflix, and the Government of Canada/British Columbia.

Sean Mehrabi
Chief Technology Officer

OUR CLIENTS

Our clients are enterprises, mid-to-large companies that struggle with specific architectural challenges or need help in their cloud journey. We deliver cloud adoption, application modernization, enterprise transformation, cloud security, data platforms, and analytics solutions to our customers around the world.

clearly

TIMELINE

When planning and estimating a project, we consider each of the following phases separately:

Week 02-04

Requirements & Design

The duration depends largely on the availability of you and your team, responsiveness to design reviews and questions, and how long it takes to make critical decisions.

Week 12-24

Planning, Architecture & Development

Planning is the activity of laying out all the tasks in order, assigning the resources, and seeing which tasks can be done at the same time and which can't.

Week 03-06

Testing

Depending on your project, there is a variety of testing that could and should be used. All projects should undergo end-to-end testing and user acceptance testing.

Conclusion

On average, we see software projects taking between 4-9 months to design and develop. The size and complexity of the project are the biggest factors in overall duration.

OUR OFFER SKILL SET

We deliver a fully functional system, service, and project from start to finish.

End-to-End Solutions

Cloud Architect

Enterprise Architect

Solution Architect

Security Architect

SecOps

DevOps

MLOps

AIOps

DevSecOps

OUR OFFER SKILL SET

Our solutions architects develop the overall vision that underlies the projected solution and transform that vision through execution into the solution.

Enterprise Solutions Architect

Our team of Architects focused on what is mattered to the business and they are fully TOGAF, ITIL

- ✓ Expert at integration and System Design
- ✓ Full understanding of REST and SOAP APIs
- ✓ Expert at Cloud Native Application Development, Serverless Framework, AWS Well-architected Native Applications, Azure Cloud Native Application Development
- ✓ Deep knowledge of Software Development Frameworks. Micro Services : Netflix OSS, Microsoft ASP.net Core Micro Services, NodeJs Micro Services: Loopback, Nest, Moleculer, Sails, Restify
- ✓ Event Base Applications

OUR OFFER SKILL SET

Our experts automate the integration of security at every phase of the software development lifecycle, from initial design through integration, testing, deployment, and software delivery.

DevSecOps

Our teams are not just certified people, they are experts in their work

- ✓ We speak SOC2, ISO27001, HIPAA, HITRUST, GDPR, CCPA, CPRA
- ✓ Deep hands on Experience with security tools like Crowdstrike Falcon, Prisma Cloud(PaloAlto Network), Fortigate
- ✓ Code Level security: Sonarqube, SNYK.io
- ✓ Hands on with Docker, Kubernetes, Ansible, Terraform, Lambda, Azure Serverless
- ✓ Full understanding and implementation requirements of Zero-Trust solutions in Clouds(Azure, AWS, Google) and On prem
- ✓ Programming lang: Python, Java, .net, NodeJs,

Certified Cloud
Security Professional

OUR OFFER

SKILL SET

All developers have at least 10+ years of software development experience in Node.js, including coding, testing, troubleshooting, and deployment.

Full Stack Development

Full Stack developers are proficient in front end languages such as

- | | |
|------------------------|-----------------|
| ✓ React JS | ✓ Typescript |
| ✓ Spring Boot | ✓ jQuery |
| ✓ Node JS + Express.js | ✓ Ruby on Rails |
| ✓ Django | ✓ GraphQL |
| ✓ Emberjs | ✓ Bootstrap |
| ✓ Backbonejs | ✓ Angular |

OUR OFFER

SKILL SET

All developers have at least 10+ years of software development experience in Node.js, including coding, testing, troubleshooting, and deployment.

Back End Engineers

Our full-stack back end engineering includes the use of programming languages and frameworks such as

- | | |
|-------------------------------|---------------|
| ✓ Ruby on Rails(ROR) | ✓ MongoDB |
| ✓ Python | ✓ Redshift |
| ✓ Django | ✓ PostgresSQL |
| ✓ Laravel | ✓ Snowflake |
| ✓ .NET | ✓ Splunk |
| ✓ MySQL | ✓ Talend |
| ✓ Azure SQL Synapse Analytics | ✓ Fivetran |

OUR OFFER

SKILL SET

Full stack developers have the knowledge and skills to build an entire mobile app, from back-end to middleware to front-end tools.

Mobile App Developers

Our full-stack mobile app developers are fully experienced in the front and back end development of full stack mobile languages, including

- | | |
|---|--|
| <input checked="" type="checkbox"/> Linux/Unix | <input checked="" type="checkbox"/> Apache |
| <input checked="" type="checkbox"/> Python, Perl, Shell Scripting | <input checked="" type="checkbox"/> iOS |
| <input checked="" type="checkbox"/> Java | <input checked="" type="checkbox"/> Adobe ActionScript |
| <input checked="" type="checkbox"/> C# | <input checked="" type="checkbox"/> AVAP |
| <input checked="" type="checkbox"/> Swift | <input checked="" type="checkbox"/> LAMP Stack |
| <input checked="" type="checkbox"/> ORACLE | <input checked="" type="checkbox"/> Ruby On Rails |

OUR OFFER

SKILL SET

All developers have at least 10+ years of software development experience in Node.js, including coding, testing, troubleshooting, and deployment.

Tech Stack Programming

Tech stack programming leverages object-relational, open-standard, and general-purpose languages and platforms, including

- ✓ Segment
- ✓ SAP BusinessObjects
- ✓ Google Apigee
- ✓ Tableau
- ✓ Mulesoft
- ✓ Looker
- ✓ Tealium
- ✓ Qlik
- ✓ Zapier
- ✓ Heap
- ✓ New Relic
- ✓ Google Analytics
- ✓ AppDynamics
- ✓ Amplitude
- ✓ Dynatrace
- ✓ Mixpanel
- ✓ Datadog
- ✓ Countly
- ✓ Microsoft Power BI

OUR OFFER

SKILL SET

All developers have at least 10+ years of software development experience in Node.js, including coding, testing, troubleshooting, and deployment.

Open Source Stack Development

We successfully develop custom software using open-source, cross-platform applications such as

- Apache
- MySQL
- Angular.js
- Laravel
- Node.js

OUR OFFER

SKILL SET

All developers have at least 10+ years of software development experience in Node.js, including coding, testing, troubleshooting, and deployment.

All Developers

- BS in computer science or equivalent
- Strong experience with TDD
- Comfortable learning new technologies and tools
- Previous experience with different Node.js frameworks like ExpressJS and Loopback
- Previous experience with Docker architecture
- Previous experience with microservice-oriented architecture
- Previous experience with restful APIs
- Experience with relational databases
- Experience with client-side frameworks such as Angular, React, Vue, etc.
- Experience with HTML5, CSS3, JQuery, JSON, XML
